**BIOGRAPHY**

I was born April 1957 in Quincy, Illinois. My family moved to the Phoenix area in 1960, and settled in the east Mesa area. My wife (Jane) and I were married in August 1978. We have six children, (ages 29 – 2) and eight grandchildren. My hobbies are fishing, golfing, and cooking.

I began my career as an electrician in April 1973 with Leading Builders, and have worked for some of the best electrical contractors in the valley through the years. I have been exposed to all phases of electrical construction and maintenance, including Residential, Commercial, and Industrial. I spent 5 years working in Intel facilities performing maintenance, and remodel of clean rooms and offices. I was also responsible for helping to design, build, and troubleshoot control and alarm systems for the machines and chemical systems at the facilities. I spent 1.5 years with Arizona Pool Builders wiring pools, spas, hot tubs, and water features as well as hooking up and troubleshooting control and lighting systems for them. I have developed a specialty in control and alarm systems for water treatment and circulation systems, fire, chemical delivery, motors, HVAC, sewage treatment, and lighting control systems. For the last 12 years I have been active in safety programs, and have attended and passed SSTA, OSHA 10 hr. OSHA 30 hr. and OSHA 500 train the trainer. I am authorized as an outreach trainer through the University of California San Diego to teach the OSHA 10 hr. and 30 hr. courses. I was awarded by the American Subcontractors Association as the “Outstanding Safety Person” for the year 1999-2000. In 2006 I earned my teaching certificate as adjunct faculty for Gateway Community College in the ABA’s electrical apprenticeship program, where I teach level 2A and blueprint reading. I also teach estimating and cost control in the foreman development program for the ABA.

All of my experience and education has given me the unique ability to successfully complete construction projects, and to control costs by managing the work force, eliminating injuries, and controlling material inventories. I am looking forward to the opportunity to be an asset for your company

## **EDUCATION**

Jefferson Elementary School-Mesa

Fremont Jr. High-Mesa

High School-GED

Phoenix College:

*Applied Electrical Codes/Mark Ode*

Gateway Community College:

*Advanced Motor Controls/George Gram*
